Blood Bank Refrigerators

4°C Blood Bank Refrigerator TBBR-170

Features

- 1-inch high-brightness digital temperature display allowing temperature display reach 0.1°C.
- Lockable door with key to prevent from opening door without authorizing.
- Aluminum fined copper tube and high-effective air-cooled type evaporator.
- Audible and visible alarm system with high/low temperature alarm, power failure alarm, door ajar alarm, power failure alarm,etc.
- 2-layer glass window door with auto defrost features ensuring temperature uniformity.
- Non-CFC rigid polyurethane insulation to avoid redundant heating.

● Structure

- Constant Temperature under Intelligent Control
- High-efficiency refrigeration for security of blood
- 3 dip-coating shelves with label strips
- Advanced air cooling design
- Store 90bags 450ml blood bags
-

● Scope of Application

Blood Blood refrigerator suitable for storage of whole blood, blood platelets, red blood cells, biological products, vaccines, drugs, reagents, etc.; Suitable for use in blood banks, hospitals, research institutions, disease prevention & control centers, etc.

● Overview

°C

4 Blood Bank Refrigerator XC-170L is a reliable blood storage refrigerator for safeguarding security of whole blood, blood plasmas, blood compartments and blood samples. The intelligent constant temperature control ensures the temperature control precision within 2~6°C inside the cabinet, which can perfectly promise the temperature uniformity. The blood storage refrigerator equipped with auto-defrost glass door ensures safe medical or lab material storage.

Constant Temperature under Intelligent Control

- Return air duct design, ensuring a temperature control precision of $\pm 1^{\circ}\text{C}$ inside the cabinet;
- High-precision computerized temperature control system, built-in sensors for upper/lower zone temperature, ambient temperature, evaporator temperature, and operation control, ensuring safe and stable operation.

Security System

Perfect audible and visual alarm system comes with alarm functions for high temperature, low temperature, sensor failure, door ajar, and power failure,etc.

High-efficiency Refrigeration ·Advanced air cooling design, precision temperature control, safeguarding security of blood ·Stainless steel inner container, copper tube evaporator, powerful refrigeration.

Refrigeration System

- Equipped with brand high-efficient compressor, EBM fan motor, performing efficient energy and quiet.
- High-precision computerized temperature control system, built-in sensors for upper/lower zone temperature, ambient temperature, evaporator temperature, and operation control, ensuring safe and stable operation

Automatic Defrost

- Optional 3 shelves and 9 dip-coating bloodbag frames , can hold 90 blood bags in 450ml for each;
- Equipped with 3 steel wired drawers with label strips(Stainless steel are optional)

Humanized Design

- Equipped with 5 dip-coating shelves with label strips;
- 9 dip-coating blood bag frames (optional stainless steel frame).

Model	TBBR-170
Cabinet type	Upright
Capacity(L)	380
Internal size(W*D*H)mm	604*494*1310
External size(W*D*H)mm	717*660*1999
NW/GW(Kgs)	134/154
Performance	
Temperature range	2-6°C
Ambient temperature	16-32°C
Cooling performance	4°C
Climate class	N
Controller	Microprocessor
Display	Digital display
Refrigeration	
Compressor	1pc
Cooling method	Air cooling
Defrost mode	Automatic
Refrigerant	R290
Insulation thickness(mm)	L/R:48, B:50

Construction	
External material	PCM
Inner material	Stainless steel
Drawers	3(coated steel wired shelf)
Door lock with key	Yes
Access port	1pc. Ø 25 mm
Casters	4 (2 casters with brakes)
Data logging/Interval/Memory capacity	USB/Record every 10 minutes / 1000,000data
Backup battery	Yes
Alarm	
Temperature	High/Low temperature,High ambient temperature
Electrical	Power failure , Low battery
System	Sennor failure,Door ajar,Condenser overheating,Built-in USB datalogger failure.
Accessory	
Options	Charter recorder
Standard	RS485,Remote alarm contact
